

Section off hair and take a 1cm section of hair from below the hairline. Make sure to take enough hair to fit inside the hole of the extension.

Pull the 1cm section of hair through the plastic loop (like threading a needle).

Pull on the bulb of the loop to pull the sectioned hair through the loop entirely.

Once the hair is completely pulled, it will merge with the extension, and you are ready to clamp the ring into place. The plastic loop is no longer required unless you need to re-use.

Use special Hot Lockz pliers to squeeze the micro-ring tightly and flatten to keep extension in place.

Repeat as necessary for desired effect, try blending different colors for variety. Adjust spacing for your preferred effect.

removal guide

Removal is easy. Simply use the Hot Lockz pliers and squeeze the micro-ring in the opposite direction back to the original "O" shape.

Once ring is back to the "O" position, simply slide extension from the head, easily and quickly.
